- Because of this course I am considering to furthering with Chinese classes.
- N/A
- What the teach taught, she taught well. However, what we learned in class did not prepare me for homework, quizzes, or exams at all. I had to learn totally from the examples in the homework, videos for quizzes, and the tutors whenever I could. The class time itself was completely unhelpful

- I found this course difficult to take online and I found myself struggling with the course material while learning on the math program. The class lectures were not always helpful to successfully completing the homework, quizzes, and tests for the class.
- Shalmali was a very great instructor, very understanding and helpful. It was very nice to have an instructor fully committed to helping students achieve academic success.
- The content presented in class was often not what would be on the homework and quizzes. They would be the basis of the concept but no more in depth which made it hard. So when it came to the material in the class I had to take all of my notes from the homework and apply them to the quizzes and tests. Even then sometimes the questions were slightly different but the changed questions were things we hadn't covered.
- This instructor was very good at explaining the material however as for me I kind of wished the class was in person because I will be more engaged by she is very good at teaching.
