

# Shalmali Bandyopadhyay

21 Fall 202108 Fall MAT 183-01 Biomathematics (MAT-183-01-Fall 2021)  
No. of responses = 8

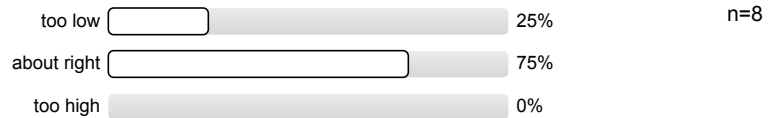

## Survey Results

### 1. Instructor Evaluation

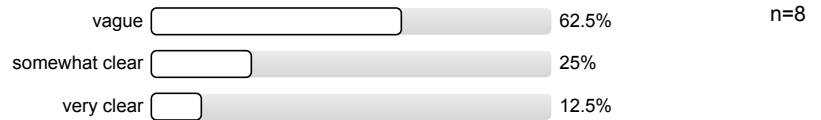

1.1) The instructor's command of the subject matter was:

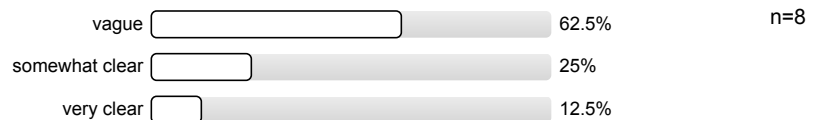

1.2) Considering the level of difficulty of this course, the instructor's level of presentation was:

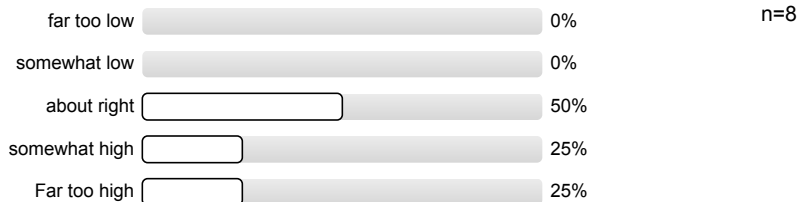

1.3) The course objectives were:

1.4) The grading procedures were:

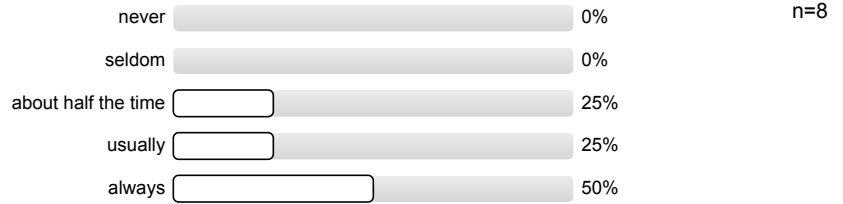

1.5) In order to determine a grade for the course, the number of tests, quizzes, graded assignments, etc. was:

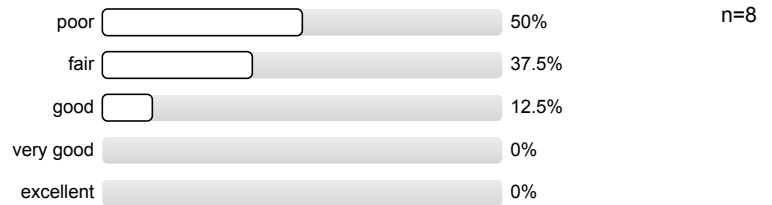

1.6) The clarity of the instructor's presentations of the course subject matter was:

1.7) Sufficient advance notice for announced tests and/or due dates for out of class graded assignments was given:

1.8) The instructor's promptness in returning tests and/or assignments was:

1.9) The exams were based on materials covered during the course or on closely related materials:

1.10) The instructor's willingness to clarify substantive points raised by students during class was:

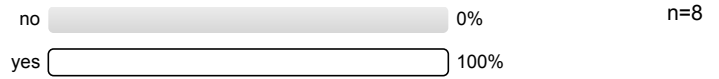

1.11) Given the level of the course material, the examinations and other graded material were:

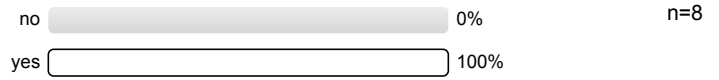

1.12) The instructor was well-prepared for class sessions:

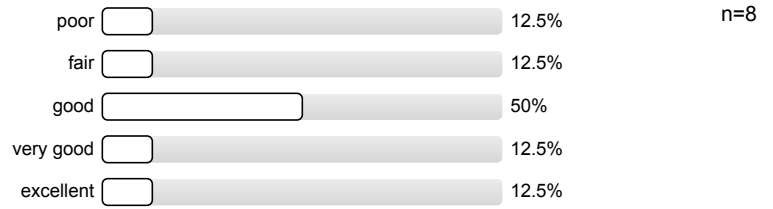

1.13) Did the instructor have posted office hours?

1.14) (Answer only if yes to question 13.) The instructor was available to students during posted office hours.

1.15) The instructor's willingness to make an appointment if a student cannot come to posted office hours was:

1.16) Overall the quality of instruction in this course was:

# Comments Report

## 1. Instructor Evaluation

<sup>1.17)</sup> You may use this space for comments:

- Hopefully someone reads this but most likely everyone's comments and concerns about this clown college will go unheard. Y'ALL. GET. IT. TOGETHER.

How was this class even green lighted???? Just go on and read everyone else's comments about this class- SERIOUSLY Y'ALL HAVE A HEAD CASE FOR CREATING THIS CLASS!

Firstly, I was very involved with this class starting the very first day: by the end of week 2 I had already been to the math center 6 times. But here's the best part- everyone at the math center (online and in person) said that they couldn't help me with this class- even though the class had just started.

Henry was by far the most helpful at the math center- there were at least 8 different people that would ask what class I was in and as soon as they heard "MAT 183" they would ignore me and say that they can't help.

Our teacher tries her hardest and she truly is a great teacher but whoever made this course screwed over every teacher in MAT 183.

THE LABS MAKE NO SENSE- THE HOUR LONG VIDEOS EVERY WEEK HAVE NOTHING TO DO WITH LAB AND WASTES EVERYONES TIME.

IT'S NOVEMBER 12TH AND I DON'T HAVE ANY GRADES PUT INTO CANVAS (AS WELL AS EVERYONE ELSE IN THE CLASS)

WHATS WRONG WITH YOU? HOW ARE YOU GOING TO ASSIGN SO MUCH HOMEWORK BUT NOT GRADE ANY OF IT????  
For reference, homework 1 and 2 are graded as well as lab 1 and 2- as well as exam 1 is graded.... Labs 3 through 12 AREN'T GRADED as well as Homework 3 through 10 AREN'T GRADED. Exam 2 and 3 AREN'T GRADED.

This better be a passing grade for all the students this class has traumatized. We spend 4 days a week in this class and all think we are going to fail because WE DON'T KNOW ANY OF THE MATERIAL.

You're probably laughing at this review because this school doesn't care about it's students- just about money and funding. Yeah it's so funny that we actually care about passing a class that we spend up to 5 hours a week in class for- and spend the same amount of time a week doing homework and labs (with no help from the math center and never get grades).

Do better.... uncg is a joke and everyone knows it.

- Ms. Shalmali was a great instructor and was very accommodating to the students. However, the course itself could use a bit more improvement. For example, the lab videos rarely corresponded with what was expected in the lab assignments.
- The instructor was awesome for this very disorganized and complicated course; she deserves all the praise for being accommodating, understanding and being willing to teach difficult topics that did not make sense; I'm not sure what the board expects for students to know before taking this "beginner" course but the organizations of the course along with the excel labs was awful; I would be scared to take this course again if it organized the same way; I felt like i was taking a 7 hour course with how long I spent on assignments and labs; Thankfully I had this amazing instructor who helped to explain some of the concepts better and gave us adequate time to digest digest material before moving on to more complicated task; the homework and the quizzes did not make sense and did not go along with the simple examples provided in the book and the book was also not very helpful for this course; I have never had a course that has been this awful but nevertheless the instructor was great! I would suggest she provide more feedback for our assignees but due to the online nature of the course, that was also difficult for her; this course needs a total revamp of the quizzes to allow for feedback when submitted and for multiple choice homework and a way for recordings of lectures to last longer than 2 weeks on zoom. Please revise this course
- The professor did not have a great grasp of the biology concepts used in this course making it difficult for her to explain and work through some of the questions. I felt that the organization of the class was frazzled and made it more difficult to follow for both the students and the professor. The professors habit of calling people out by name if they had emailed her a question about a homework problem, test or grade in the zoom lecture rather than answering their email made classes awkward.
- This course was run horribly. There were way too many assignments and they did not match for each week. Half of the time our teacher was confused by how badly her superior was with relaying information. On the bright side, my instructor was the most amazing teacher I have ever had the pleasure to work with. She is by far qualified for this position, but the class organization and material were way to confusing. I would never take this class again, but I would work with this instructor.
- Unorganized class
